Helsinki, Finland

Hard Skills

- A/B Testing
- Data Visualization
- Statistics
- Business metrics
- SQL
- Python
- Data Storytelling
- Data Cleaning & Validation

Tools

- Google Analytics
- Google Sheets
- Tableau
- Power BI
- Looker Studio
- Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
- BigQuery
- Excel
- Power Point

Soft Skills

- Communication skills
- High learning ability
- Analytic skills
- Teamwork
- Approachable
- Calm

Languages

- English - Upper-Intermediate
- Ukrainian - Native

Kopyl Daniil - Junior Data analyst

Summary

Junior Data Analyst with experience in data analytics and dashboard development. Key skills: Excel, Power BI, SQL, basic Python (pandas, numpy), data visualization. Achievements: Analyzed data for project and each period, which helped to understand the volumes and optimize the process or identify trends. Goal: Looking for an opportunity to develop in the field of data analytics and help companies make data-driven decisions.

Project Experience

Streaming User Behavior Analysis

- **Tools:** SQL, Google Sheets, Looker Studio
- **Description:** Collected and analyzed user session data from a streaming platform to understand viewing behavior patterns, engagement levels, and churn tendencies. Built analytical tables and dashboards to track how content type, device, country, and subscription plan influence viewing time and retention.
- **Tasks:** Extracted and cleansed large session log data including fields such as user IDs, session timestamps, content metadata, and engagement flags (e.g., completed or churned). Performed exploratory data analysis to identify trends in watch time by genre, device, and geographical region. Created visualizations and reports to highlight patterns in user engagement and churn. Automated metrics aggregation in Google Sheets for ongoing monitoring.
- **Results:** Identified key content genres and devices associated with the highest engagement durations. Revealed insights into churn likelihood related to specific subscription plans. Streamlined reporting with interactive dashboards, reducing manual analysis time.
